

KWC

KWC
ELLA

GO WITH THE FLOW

Understated yet bold, refined yet daring – what may seem like a contradiction is actually the key to creating classic design. And KWC ELLA is just that: with its subtle curves, smooth angles, and clear contours, the line of faucets will be as modern tomorrow as it is today.

Timeless elegance

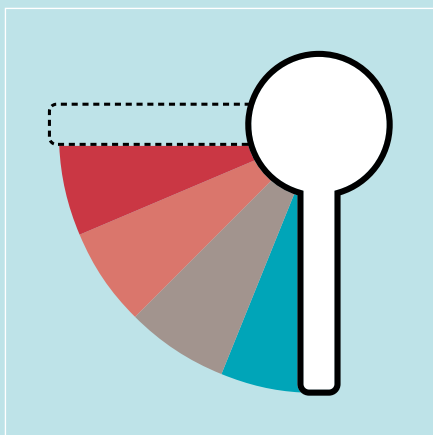

To highlight the hardware's sophisticated design, the understated aerator is seamlessly integrated into the faucet.

Sleek and stylish

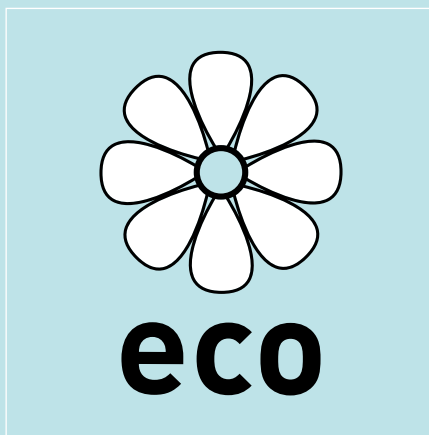

Restrained confidence: with its subtle, self-assured style, this faucet lends a special touch to every bathroom.

KWC +

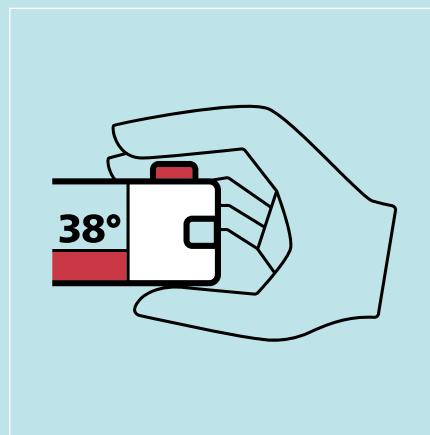

CoolFix

Intelligent and efficient resource usage: With CoolFix, when the lever is in the center – the most common position – the water runs cold. Only when the lever is turned to the left, the water runs warm.

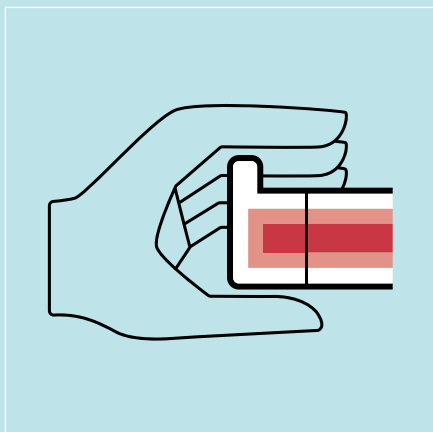

EcoProtect

For the highest energy classes and responsible use of resources: EcoProtect represents our commitment to promoting a sustainable lifestyle. For example, the turning handle that limits the water flow level. To switch off the water-saving mode, simply turn the handle back past the soft catch point.

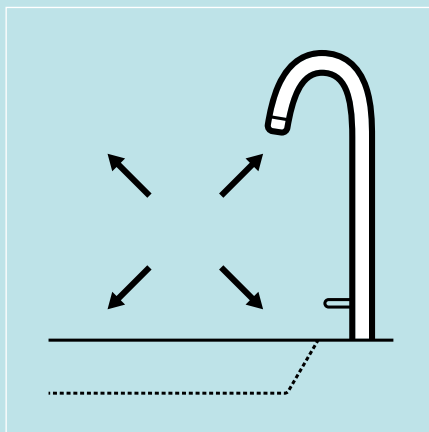

SkinProtect

Effective protection against scalding: With SkinProtect, your faucet will only supply you with water hotter than 38 °C when you press the safety button on the temperature controller. If the cold water is shut off, the faucet automatically shuts off the hot water immediately.

TouchProtect

Safe to use: An insulated hot water guidance system with a "double skin" principle means the body of the faucet or the pull-out spray can become warm but never hot. In this way, TouchProtect intelligently prevents scalding.

OptimalSpace

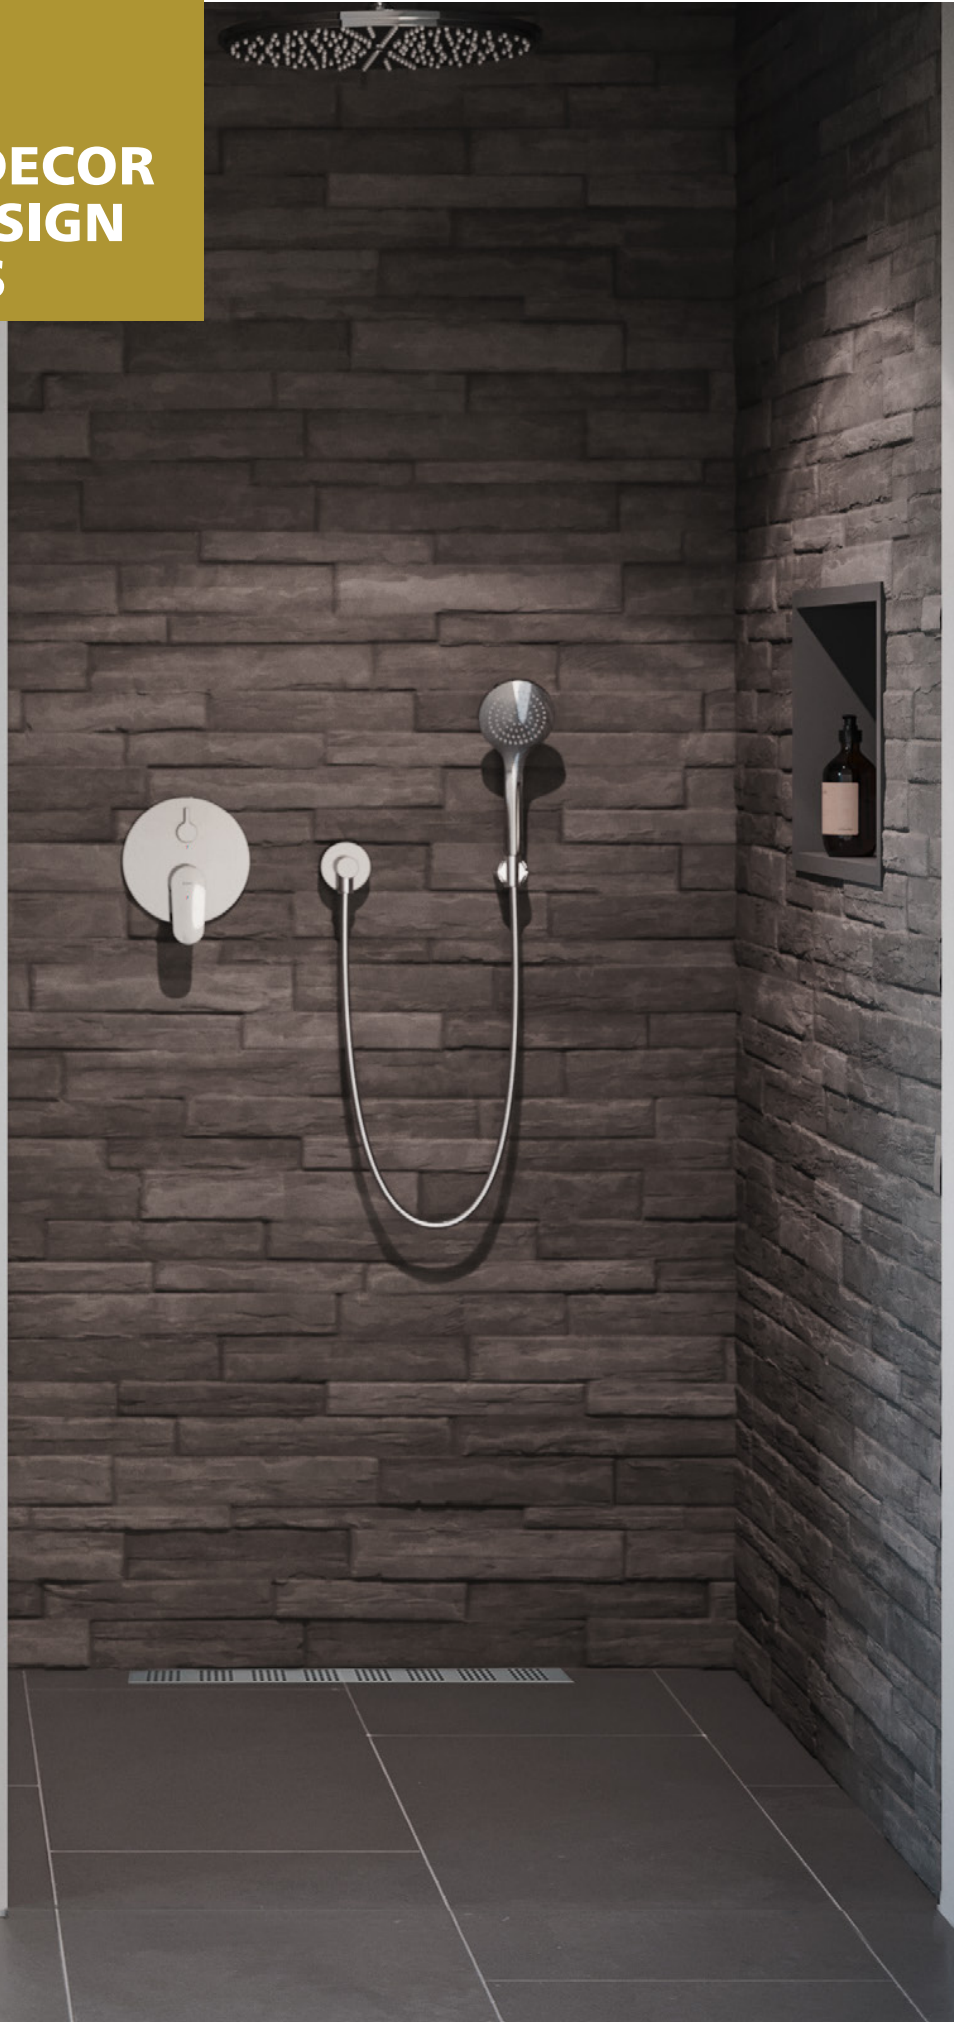

Practical yet elegant ergonomic design: OptimalSpace features long, tall spouts that provide ample space for washing and or working.

GlacierFinish

Robust surfaces and high-quality craftsmanship: GlacierFinish is equipped with durable surfaces that are exceptionally robust and feature an attractive polished shine that you can enjoy for years to come.
